

# TuLAKO 2 -SERIES SMALL SIZES NEW CONSEPT HEADS

# TuLAKO 2 -SERIES SMALL SIZES

# Compact – light – powerful - versatile

## HYBRID: Expanding the StemMaster utilization like a harvester & felling head combination

Common felling head can be modified as a continuously collection head by adding feeder units to the tilt arm

Also a typical harvester head can be modified as a continuously collection head by feeder units to tilt

Standard style of harvester head can be updated as a continuously collection head by adding bolted on feeder units to tilt arm

## STEMMASTER + HARVESTER HEAD AS A HYBRID VERSION

StemMaster can be also combined with a harvester head in order to expand the ability to handle wider range of different size and type of trees from very small size like biomass up to pulp wood and saw logs

Concept design of StemMaster Hybrid harvester heads.

Stemmaster felling style of (tilted or fixed) head.
